ABOUT ME:

I'm an experienced art director and production designer, graduate of Radio TV and Cinema from NDU (Notre Dame University).

I'm a passionate, enthusiastic, talented, hardworking person with a high and sharp creativity in the world of cinema. I can transform any script and story written to a real world on set where any audience can live and interact with it. Creating an identity for all the characters (colors, culture, style and personality) is where I excel.

With my 6 years of my professional experience in the field, I so far accomplished and finished successful series and ads. And aiming to keep on working on more successful projects, while developing and improving my ideas, creativity, knowledge and love for what I do.

I believe that my extensive experience, solid foundation in the field and undying passion for the cinema and art makes me most valuable candidate, and great asset for every production.
