

MM

MOHAMAD FOUAD MCHAWRAB

MID FULL-STACK DEVELOPER | REACT | REACT-NATIVE |
NODE.JS | EXPRESS.JS | MONGODB

OBJECTIVE

Obtain a job in a reputable company that can identify my knowledge. I have the ability to work alone and prove myself, or lead a team when the need arises here in Lebanon or aboard

SKILLS

Software developer specialized and experienced with all stages of the development cycle for dynamic hybrid and native projects. Well-versed in numerous programming languages including Java-script react react-native.

TECHNICAL SKILLS

JavaScript, CSS, HTML, React webgl API Redux, MongoDB, Express, Git, Swift python wordpress, and well familiar JAVA J2ee technologies and Knowledge of Object-Oriented Programming and designs.

EXPERIENCE

PC-GLOBAL AND FREELANCING IN SOFTWARE DEVELOPMENT • 2017 TO 2020

- Cooperate with designers to create clean interfaces and simple, intuitive interactions and experiences
- Performed technical designs and implementation of 3+ complex Full stacked apps.
- Work with senior developer to manage large, complex design projects for corporate clients.
- Developing apps that interact with Web Services (REST, JSON), and Firebase integrations.

IOS DEVELOPER • TEDMOB • 2015 TO 2017

- Performed technical designs and implementation of 2+ complex iOS apps available on AppleStore.
- Improved product quality through code reviews, writing effective unit tests and collaborating with QA on implementing automation testing, and publishing process to the apple store.

EDUCATION

MASTERS DEGREE GEOGRAPHIC INFORMATION SYSTEM • 2020 • LEBANESE UNIVERSITY HADAT.

Mastered a framework for gathering, managing, and analyzing data with a Authorized license from Esri Training. Rooted in the science of geography, GIS integrates many types of data. It analyzes spatial location and organizes layers of information into visualizations using maps and 3D scenes, programming language used **python**. Including a Full course in IOT and it's Services

BS DEGREE IN COMPUTER SCIENCE • 2017 • LEBANESE UNIVERSITY HADAT A bachelor degree in computer science with a GPA of 2.9.

- **More About myself** : A lebanese citizen were 4th of Aug 2020 explosion changed his life a lot. I'm a Mid full stack developer, and I specialize in efficient React React native apps CSS & HTML that just work across all platforms and browsers. I care deeply about building interfaces that are usable and pleasant for the most number of people possible.
My professional life has been 100% driven by my passion for design and structure. I was sketching crazy detailed 3d models and games for fun when I was a kid, started building promo websites and apps for small businesses while in school. For the past two years I focused the most and transitioned to React.js and React Native It has been 3+ years and now I am able to create scalable, fast, responsive, and intuitive native apps, and web apps, even better than I used to admire. I'll always try to secure the position of a Senior Full Stack Developer and hope to share my skills, expertise and experience with your team and valuable clients “.

OVERVIEW OF SOME PROJECTS

- Designed, architected and wrote the front-end of a eCommerce application using ReactJS and it's backend using node, Optimized service layers, request queues and MongoDB data model, The backend, built using Node, Express, and Mongo, takes advantage of a well-developed RESTful API, Geospatial searching, and user authentication with JWT." A big store provide products all classified into categories with a full admin control in adding removing handling orders.
- Lately started a project using react-native with expo's help it's idea is about giving users the ability to sell stuff they are done with it will plenty of features and lovely animations that would give the store a nice overview.
- This project was my entire start up in building cross mobile hybrid apps, it was able to top-up your own phone or send load to mobiles worldwide. Mobile phone credit is known by many different terms around the globe; top-up, recharge, load, airtime, refill and more. Whatever phone credit means to you, it can be delivered. I coded it all based and integrated with RESTful API calls with a lovely design, linked to www.ding.com.
- Developed a language learning app, using spaced repetition and a linked list data structure with a Team of 5 masters in programming were i was responsible for building part of it's frontend and managing data storage. React was used to create the front end components while Node and Mongo were used to create a backend that stores user data.
